

ARDEAHSYAH'S PROFILE

Curriculum Vitae

ARDEAHSYAH ALIMUDIN

Enterprise Process Excellence Leader

Selangor, Malaysia • +6017 258 1475 • ardeahsyah@gmail.com • [linkedin/ardeahsyah](https://www.linkedin.com/in/ardeahsyah) • <https://ardeahsyah.github.io/ardeahsyah/>

EXECUTIVE PROFILE

Enterprise Process Excellence Leader with a proven track record of driving large-scale transformation, operational excellence and performance improvement across complex, multi-business environments spanning financial services, e-commerce, manufacturing and aviation. Proven ability to translate business strategy into measurable improvements in productivity, cost efficiency, service quality, customer experience, operational resilience and governance.

Experienced in leading enterprise process transformation, operating model and workflow redesign, Lean Six Sigma, digitalisation, automation, AI and data-driven performance management. Proven ability to establish transformation governance, lead cross-functional and regional initiatives, strengthen KPI and performance management, and partner with senior leadership to deliver sustainable business outcomes.

Combines strategic transformation leadership with deep hands-on expertise in process improvement and structured problem solving, with a track record of eliminating waste, reducing process variation, improving turnaround time, strengthening quality and controls, and building continuous improvement capabilities. Brings a customer-centric and data-driven approach to transforming complex operations, with the ability to translate improvement opportunities into scalable solutions that enhance stakeholder value and organisational performance.

CORE LEADERSHIP COMPETENCIES

Enterprise Transformation & Strategy Execution • Operational Excellence & Continuous Improvement • Process & Operating Model Transformation • Digital Transformation & Automation • AI-Enabled Process Innovation • Customer Experience & Service Transformation • Enterprise Performance & KPI Management • Lean Six Sigma & Structured Problem Solving • Data-Driven Decision Making & Analytics • Cross-Functional & Regional Transformation • Change Leadership & Capability Building • Executive & Board Stakeholder Management

PROFESSIONAL EXPERIENCE

Assistant Vice President, Head of Process Excellence | Credit Guarantee Corporation Malaysia (CGC)

Enterprise process excellence leader responsible for governing process improvement initiatives, driving digital modernization, and strengthening organizational performance.

- **Lead the Process Excellence function and enterprise improvement portfolio**, partnering with senior leadership, business owners and technology teams to translate strategic priorities into process redesign, automation and measurable business benefits.
- **Spearhead Strategic Workforce Planning across all divisions**, identifying workforce optimisation opportunities while establishing structured tracking of turnaround time, capacity requirements and cost impact.
- **Lead future-state process redesign and efficiency assessments** for major digital transformation programmes, evaluating NVA reduction, turnaround time, FTE requirements and operating cost across end-to-end processes, including the Guarantee e-Management System (GeMS) covering Product Evaluation, Onboarding & Application Evaluation, Billing, Monitoring, Claims and Recovery; iGuarantee web portal serving nationwide financial institutions; HR recruitment and onboarding; performance, rewards and promotion; and Finance & Procurement Portal transformation.
- **Co-developed CGC Agent-Thon 2026 in collaboration with Microsoft**, shaping enterprise AI use cases across customer support, document validation, exception management, productivity measurement, early-warning insights and automation opportunity identification.

- **Led AI-enabled process improvement initiatives** across claim checklist automation, guarantee-evaluation content validation, innovation proposal screening, and customer experience analytics.
- **Led executive and divisional performance reporting**, including COO and Board dashboard initiatives, KPI consolidation, operational analytics and enterprise performance visibility.
- **Built organisation-wide transformation capability**, designing and delivering a Process Improvement syllabus covering 20+ tools, methodologies and practical workshops for **150+ leaders and employees**, embedding continuous improvement and data-driven problem solving.
- **Identified and championed the iGuarantee Web Portal solution to address communication inefficiencies with nationwide financial institutions**, streamlining request submission and communication between financial institutions and CGC. **Reduced the ISO Survey's top service issue—delayed responses to requests—from 70% in 2022 to below 10% in 2024**, significantly improving response experience and stakeholder satisfaction.
- **Spearheaded Operations data centralisation and performance visibility**, consolidating fragmented operational data and reports from personal and shared folders into a centralised **SharePoint repository**. Established an enterprise **Power BI dashboard** providing end-to-end visibility of operational KPI performance from **Application & Onboarding through Billing, Monitoring, Claims and Recovery**. **Eliminated 16.9% of non-value-added reporting activities and reduced manual report preparation by 90%**, transforming reporting into a one-time Power BI template configuration with automated data refresh and performance visibility, enabling more consistent KPI tracking and data-driven decision-making.
- **Led end-to-end workflow transformation across Billing, Monitoring, Claims and Recovery** through the transition from a legacy platform to the in-house **Guarantee Core Management System**. Redesigned internal workflows by eliminating email-based handoffs and manual maker activities, replacing them with automated system workflows, preparation, computation and validation. **Embedded process controls and standardised decision logic into the system**, improving process efficiency, reducing manual intervention and strengthening operational accuracy and governance.
- **Centralised product guidelines and reference documents through the iGuarantee Web Portal**, replacing manual email distribution by CGC Product teams with a single, controlled repository accessible on demand by nationwide financial institutions. Improved document accessibility strengthened information consistency and reduced dependency on manual communication for guideline updates.
- **Spearheaded reporting automation for the Collection Centre Unit (CCU)**, transforming a manual nationwide branch data collection and consolidation process using advanced Excel formulas, VBA and Power BI. **Reduced reporting preparation time by 98%, from 5 working days to approximately 5 minutes**, while enabling collection performance to be monitored at **user level on an hourly basis instead of monthly**, significantly improving operational visibility and management responsiveness.

Senior Manager, Operational Excellence Specialist | RHB Banking Group

- **Drove Lean transformation across branch and operational functions**, streamlining end-to-end process flows and eliminating non-value-added activities.
- **Redesigned corporate loan workflows**, increasing loans achieving readiness for disbursement within 90 days from **70% to 85%**, improving service delivery and stakeholder satisfaction.
- **Led cross-functional teams in implementing Daily Management Systems and Value Stream Management**, improving quality, service levels and turnaround performance.
- **Improved Service Request (SR) SLA fulfilment from 88% to 94%** across approximately **75,000 service requests per month** across all receiving touchpoints.
- **Appointed Lead for Operations High-Performance Champions**, driving improvements in Internal Customer Experience Survey and Employee Engagement Survey.
- **Led strategic Kaizen initiatives and organisation-wide Lean capability building**, embedding structured problem-solving and continuous improvement practices across all levels. **Designed and rolled out a comprehensive Process Improvement training programme aligned with global Lean Six Sigma standards**, training **500+ employees** and strengthening internal improvement capability.
- **Coached senior leadership on Lean principles, customer-centric transformation and change management**, contributing to the (Customer Experience) CX 5-Year Roadmap and leading the institutionalisation of CX principles across process design and customer interactions. Supported initiatives contributing to Malaysia NPS ranking

improvement from **4th to 3rd in 2022**, with best practices subsequently replicated across **RHB Singapore and Cambodia**.

- **Applied Design Thinking to improve customer experience for Premier Relationship Managers and their clients**, developing a prototype application to streamline communication and enhance relationship management.

Head of Warehouse Process Improvement & Operational Excellence | ZALORA Group

Covering Process Excellence, Data Science & Analytics, Quality Control & Assurance, SOP Governance, Facilities and Graduate Trainee Development

- **Established a Lean Champion Programme across ZALORA**, identifying and developing change agents across departments, training them in Lean Six Sigma tools and methodologies, and coaching them to lead Quality Control Circle teams. **Launched a Process Improvement Suggestion System that generated 447 improvement ideas annually from 250+ employees**, strengthening employee-led continuous improvement and operational problem-solving.
- **Transformed daily Obeya meetings into a real-time, data-driven performance management system**, replacing manual and siloed whiteboard updates with centralised departmental metrics using Google Sheets query functions. **Developed an interactive performance dashboard with automated visual alerts for underperformance**, reducing meeting time while improving management focus, accountability and visibility. Recognised for the impact and subsequently entrusted with **warehouse-wide data analytics leadership**, later migrating the solution to Tableau for greater scalability and visualisation.
- **Led end-to-end process and quality governance for ZALORA Warehouse**, establishing sustainable frameworks to drive operational consistency, standardisation and continuous improvement. **Introduced a centralised Standard Work Repository** for SOP governance and accessibility and **designed an internal audit framework modelled on ISO 9001 principles** to strengthen process compliance, quality discipline and accountability.
- **Led cross-country process standardisation across ZALORA warehouses in Malaysia, Indonesia and the Philippines**, harmonising best practices, eliminating process redundancies and improving operational consistency and cross-border efficiency.
- **Pioneered the rollout of the Go See Think Do (GSTD) methodology across ZALORA warehouses in Malaysia, Indonesia and the Philippines**, institutionalising structured problem-solving and continuous improvement practices across regional operations.

Lean Six Sigma Group Technical Engineer Head of Department (1 Factory in Medan, Indonesia & 5 Factory in Selangor, Malaysia) | Smart Glove Group of Company

- **Led operational excellence across Production Quality, On-Time-In-Full (OTIF) delivery, Raw Material Just-In-Time (JIT), Cost of Poor Quality (COPQ), Total Productive Maintenance (TPM), GMP, 5S and Safety**, aligning manufacturing performance with Lean Six Sigma objectives.
- **Led the automation of production monitoring and control through PLC and SCADA integration**, reducing defects per million from **20,000 to consistently below 500** and significantly improving production quality. Established a **"Do It Right First Time"** culture that enabled the implementation of the Dip Strip Pack concept while reducing reliance on excessive quality inspection.
- **Implemented Statistical Process Control (SPC) and automated process monitoring through SCADA and PLC systems**, strengthening real-time control of critical manufacturing parameters and reducing process variation by **more than 95%**. Improved product consistency while strengthening compliance with company, customer and regulatory requirements.
- **Led Lean waste elimination initiatives using Gemba walks and Seven Wastes analysis**, systematically identifying and eliminating non-value-added activities across manufacturing operations.
- **Designed and deployed a specialised A3 problem-solving framework for 24/7 medical device glove manufacturing operations**, providing factory managers and frontline teams with a structured visual management system to identify, prioritise and resolve operational issues. **Improved issue visibility, accountability and resolution speed across factory operations**.
- **Led structured quality problem-solving through FMEA and 8D methodologies**, proactively addressing critical quality issues and customer complaints through systematic root-cause analysis, containment and corrective action. **Improved product reliability and reduced recurrence of quality issues and customer complaints**.

LSS & Compliance Quality Engineer | General Electric Aerospace Engine Service Malaysia (GEESM)

- **Internal quality audits and compliance assessments** against global aviation airworthiness requirements and GE quality procedures, documenting findings and process adherence to maintain regulatory and customer audit readiness.
- **Led Lean-based defect investigation and root-cause elimination**, applying **RCA, Poka-Yoke and GE's 4-Blocker problem-solving methodology** to identify systemic manufacturing weaknesses, reduce recurring defects and establish sustainable error-proofing controls.
- **Deployed the GE Aviation Production System (GEAPS)** across Business Control, Plant Control and Cell Control levels, establishing a multi-tier performance management system that strengthened operational transparency, data-driven decision-making and escalation of production issues, contributing to reduced line downtime.
- **Established the Standard Operation Quality Control (SOQC) system**, integrating GE Beliefs, visual management and real-time performance metrics into a centralised dashboard. **Enabled shop-floor teams to monitor live operational performance and respond rapidly to emerging issues**, strengthening ownership and accountability.
- **Designed and launched the digital "Engine of Quality" dashboard** as a Plant Control Centre, consolidating real-time **Productivity, Quality and Safety** metrics with drill-down visibility to Cell Control performance. **Enabled operational leaders to identify deviations and take immediate corrective action using live data.**
- **Coordinated structured Management Walk-Arounds (MWA)** across **People, Process and Technology** dimensions, identifying improvement opportunities and strengthening frontline engagement in continuous improvement.

Lean Six Sigma Consultant & Technical Specialist | Meridian Biz Management (MBizM)

- **Consulted with Project Owners, Process Owners and Operations teams** to establish performance targets, identify improvement opportunities and deliver Lean Six Sigma initiatives aligned with business KPIs and operational priorities.
- **Delivered Lean Six Sigma training and implementation programmes**, coaching client teams on **DMAIC and core Lean Six Sigma tools** and using practical Quality, Cost and Speed simulations to demonstrate the business impact of structured process improvement.
- **Conducted stakeholder interviews, data gathering and process analysis** to identify performance gaps, evaluate root causes and translate operational findings into actionable improvement recommendations.
- **Developed and supported implementation of process improvement recommendations**, including redesigned procedures, forms and reports. Facilitated employee training and follow-up reviews to assess adoption and effectiveness of implemented changes.

Process & Quality Engineer | Smart Glove Corporation

- **Led manufacturing engineering and operational improvement activities across the organisation**, providing functional leadership to **22 engineers through indirect reporting** and partnering with Operations leadership to improve productivity, quality and cost performance.
 - **Drove Lean and Six Sigma initiatives to optimise manufacturing processes and reduce operating costs**, applying process analysis, statistical methods and root-cause problem solving to improve product quality and operational efficiency.
 - **Led investigation and resolution of quality complaints, non-conformities and product failures**, applying structured root-cause analysis and corrective action to prevent recurrence and strengthen product reliability.
 - **Led critical-factor data analysis and statistical problem solving**, identifying key process drivers and failure modes to support evidence-based manufacturing decisions and process optimisation.
 - **Established operating specifications and measurement requirements for new products and raw materials**, ensuring effective process controls and measurement-system capability throughout product introduction and manufacturing.
 - **Supported ISO 13485 and GMP compliance as an internal auditor**, conducting cross-functional audits, addressing NCR/CAR findings and supporting corrective actions arising from TÜV audits.
 - **Led continuous improvement capability building across the manufacturing organisation**, delivering training in **OEE, SPC, 5S, Lean Six Sigma and GMP** to operators, supervisors, executives and managers.
-

EDUCATION & PROFESSIONAL CERTIFICATIONS

Bachelor of Chemical Engineering, Universiti Putra Malaysia (2006 – 2010)

Certificates	Issued by
College Vice President	University Putra of Malaysia
Director: 25 th College Leadership Camp	University Putra of Malaysia
Head of Protocol in College Academic Event	University Putra of Malaysia
Committee of Protocol & Ceremony unit in National Chemical Engineering Symposium	University Putra Malaysia In collaboration with IChemE
Representative for State Level Student Leadership	National Productivity Corporation (NPC)
Representative for State Advance Level Student Leadership	National Productivity Corporation (NPC)

Professional Certificates

Certificates	Issued by
Talent Development Programme (VPs & AVPs)	Learning Edge
Six Sigma Black Belt	BSI Services
Six Sigma Black Belt	ProQual Training
Power BI Data Analytics	TED Learning
Agile, Design Thinking, Data Analytic	Human Inc, RHB
Train the Trainers	HRD Corp
Medical Device Process Validation	TUV SUD PSB (Malaysia) Sdn Bhd
AS9110 Quality Management System	Neville Clarke
Root Cause Analysis	Neville Clarke
Lean Six Sigma Champion Master Class	Expitries Worlwild Sdn Bhd
Problem Solving Through 7QC tools	Proqual Training
Statistical Process Control	Proqual Training
ARMY Young Lieutenant	Ministry of Defence

SKILLS & CAPABILITIES**Leadership Capabilities**

Leadership Capability	Demonstrated Application & Business Impact
Situational Leadership	Adapt leadership and coaching approaches across senior leaders, business owners, technology teams and frontline employees based on stakeholder needs and transformation context.
Adaptive & Flexible Leadership	Evolved from Lean and Operational Excellence into digital transformation, AI-enabled improvement and Strategic Workforce Planning.
Change Leadership	Led major workflow transformations, replacing manual and email-based activities with automated workflows, controls and standardised decision logic.
Strategic Leadership	Translate organisational priorities into enterprise Process Excellence, workforce optimisation, process redesign and measurable business outcomes.
Coaching & Capability Development	Built improvement capability through training and coaching, including 20+ Process Improvement tools for 150+ employees at CGC and 500+ employees at RHB.
Data-Driven Leadership	Use operational analytics, KPI dashboards and performance management to strengthen management decision-making.
Continuous Improvement Leadership	Establish Lean and employee-driven improvement programmes that embed continuous improvement into daily operations.

Customer-Centric Leadership	Lead improvements focused on customer experience, including iGuarantee, contributing to delayed-response issues reducing from 70% to below 10%.
Innovation Leadership	Co-developed CGC Agent-Thon 2026 with Microsoft and drove AI-enabled process improvement initiatives.

Problem Solving Skills

Methodology / Tool	Demonstrated Application & Business Impact
Lean Six Sigma / DMAIC	Led enterprise and functional improvement programmes across CGC, RHB, ZALORA, manufacturing and consulting environments; trained 500+ employees at RHB and 150+ leaders and employees at CGC .
Value Stream Management / Process Mapping	Led cross-functional implementation at RHB to improve service flow, SLA performance and operational visibility across approximately 75,000 service requests per month .
SPC / Statistical Analysis / Minitab	Applied statistical analysis, regression and SPC to manufacturing processes; reduced process variation by more than 95% through automated process monitoring and control.
Gemba / Seven Wastes	Applied shop-floor observation and waste analysis across manufacturing operations to identify and eliminate non-value-added activities.
A3 Problem Solving	Designed and deployed a specialised A3 framework for 24/7 medical-device glove manufacturing , strengthening issue visibility, accountability and structured problem resolution.
FMEA/ 8D/ RCA	Led structured quality problem-solving for critical quality issues and customer complaints, applying FMEA, 8D, root-cause analysis, containment and corrective action to reduce recurrence and strengthen process and product reliability.
Poka-Yoke	Applied error-proofing principles at GE Aviation to address systemic manufacturing weaknesses and reduce recurring defects.
5S / OEE	Applied Lean manufacturing and operational excellence practices across medical-device manufacturing to improve productivity, quality, equipment performance and workplace discipline.
Design Thinking	Applied customer-centric design methods at RHB to develop a prototype application for Premier Relationship Managers and their clients, improving communication and relationship management.
Agile	Applied Agile delivery principles, project tracking and cross-functional collaboration within digital transformation programmes (Guarantee eManagement System, iGuarantee web portal).

Technology Skills

Technology	Demonstrated Application & Business Impact
AI & Microsoft Copilot Studio	Developed AI agents for document evaluation and processing; led AI-enabled process improvement initiatives across claim checklist automation, guarantee-evaluation validation, innovation proposal screening and customer experience analytics.
Power BI	Developed enterprise operational dashboards covering Application & Onboarding through Billing, Monitoring, Claims and Recovery; reduced manual reporting preparation by 90% and eliminated 16.9% of non-value-added reporting activities .
Power Automate & Microsoft Forms	Designed digital forms, automated workflows and centralised data collection, including the Climate Change & Principle-based Taxonomy (CCPT) solution deployed across nationwide branches with automated consolidation and rating.
Power Apps	Developed self-service applications supporting Strategic Workforce Planning , enabling users to update and monitor initiative performance.
Excel, VBA & Power Query	Automated high-volume reporting and data consolidation; reduced Collection Centre Unit reporting preparation from 5 working days to approximately 5 minutes .

	Automated workforce man-hour analysis and communication/response consolidation for 500+ recipients, significantly reducing manual data collection and consolidation effort.
Google Sheets	Applied QUERY and IMPORTRANGE functions to centralise warehouse KPIs covering Inbound, Outbound, Inventory, Logistics, QC and QA across regional operations.
Jira / Atlassian	Applied Agile project management and delivery tracking across digital transformation initiatives, including G-Core transformation projects.

Languages

Language	Proficiency & Demonstrated Capability
English	Professional working proficiency. Experienced in developing training materials, policies, memoranda, Standard Operating Procedures (SOPs) and Work Instructions, and delivering professional training across multiple industries.
Malay	Professional working proficiency. Experienced in developing training materials and delivering training programmes in Bahasa Melayu, including 5S training for Majlis Perbandaran.
Mandarin	Professional working proficiency; able to speak and read Mandarin, with experience delivering training and facilitating technical and operational communication with suppliers from China.
